-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claims 4-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

1.) In claim 4 "the UV power supply" lacks a proper antecedent basis.

2.) In claim 5 "the white light socket" and "the white light switch lacks a proper antecedent basis.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 3, 13, 15 and 26 are rejected under 35 U.S.C. 102(e) as being anticipated by Hopkins. Hopkins discloses a UV light source 326; a white light source 302 (see column 6, lines 33-35) ; a UV sub-housing 304; a white light sub-housing 310 and 312; wherein: the UV light source is contained in the UV sub housing and the white light some is contained in the white light sub-housing so that the white light source is separated from the UV light source, preventing interference between the UV light

source and the white light source within the device. The UV sub housing includes an inner reflective surface 402.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2, 4-10 and 16-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hopkins. Hopkins discloses the claimed invention except for the teaching of the specific type of light source being used. It would have been obvious to one skilled in the art at the time the invention was made to substitute a light source with a light socket, a light source having an ignitor and transformer, a halogen light, an incandescent light, a fluorescent light or a light with a dimmer for the white light of Hopkins in order to provide a well known alternative low voltage light source.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2875

6. Claims 14 and 27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hopkins. Hopkins discloses the claimed invention except for the teaching that the white light includes a reflective surface. Hopkins teaches an inner reflective surface for a UV light source. It would have been obvious to one skilled in the art at the time the invention was made to modify the white light of Hopkins to include a reflective surface as taught a by Hopkins in order to efficiently reflect light.

Allowable Subject Matter

7. Claims 11-12 and 24-25 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ott, Duggan and Ohm et al disclose lighting assemblies which are similar to applicant's invention
